SUMMARY

Computer Science student (B.Tech, graduating 2027) building and deploying full-stack web applications with Next.js, React.js, Node.js, and Express.js. Full Stack Development Intern at Innovation Hacks, building and deploying a full-stack productivity platform with PostgreSQL and JWT-based authentication; also built a blockchain-based voting system with role-based access control. Seeking an entry-level Full Stack Developer role.

SKILLS

- **Languages:** JavaScript, Java, Python
- **Frontend:** Next.js, React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MySQL
- **Tools & Deployment:** Git, GitHub, Postman, Vercel, Render

EXPERIENCE

Full Stack Development Intern, Innovation Hacks — Aug 2026 – Sep 2026 | Remote
GitHub Repo link | Live demo

- Built a full-stack Developer Productivity & Project Management Platform using Next.js, React.js, and Tailwind CSS, with a Node.js/Express.js REST API backend.
- Implemented JWT-based authentication with bcrypt password hashing, and used React Context API (AuthContext) to manage login state across the app.
- Designed a PostgreSQL database (users, projects, tasks) and wrote raw SQL queries via node-postgres, with Neon for production hosting.
- Deployed the application with the frontend hosted on Vercel and the backend on Render.

PROJECTS

Blockchain-Based Voting System — GitHub Repo link | Live demo
React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Solidity, Ethereum, MetaMask, Ethers.js, JWT

- Built a full-stack voting application with a responsive React.js and Tailwind CSS interface and a Node.js/Express.js backend using PostgreSQL.
- Implemented Solidity smart contracts on Ethereum, integrated with MetaMask and Ethers.js, to enable transparent voting.
- Added JWT-based authentication with bcrypt password hashing and role-based access control for Admin and Voter users.

Hospital Management System — GitHub Repo link
Core Java, Java Swing, AWT, JDBC, MySQL

- Built a Java desktop application with a Swing/AWT interface to manage patient and doctor records, including a login system and modules to add, update, and delete patient details.
- Connected the application to a MySQL database through JDBC to store and manage the records.

Byte2Bite — Online Food Ordering Platform — GitHub Repo link | Live demo
HTML5, CSS3, JavaScript

- Built a responsive frontend for an online food ordering platform using HTML5, CSS3, and JavaScript.
- Implemented interactive food customization and checkout features, with layouts adapted for different screen sizes.

EDUCATION

B.Tech, Computer Science & Engineering — 2023 – 2027 (Expected)
Bansal College of Engineering, Mandideep | CGPA: 6.61/10
Coursework: Data Structures and Algorithms, Object-Oriented Programming, Databases, Operating Systems, Computer Networks

CERTIFICATIONS

- Data Structures and Algorithms, NPTEL, 2025
- AI Foundations Associate, Oracle Cloud Infrastructure (OCI), 2025
- Introduction to Data Science, Cisco, 2025

HACKATHONS

- Data Extraction Engineer Hackathon, Relu Consultancy
- BGI Hackathon (Certificate of Participation): Developed an AI Citizen System focused on citizen services.
